ESTHETICS

NON-INVASIVE

We are happy to provide a variety of weight management programs, ask our staff about what options are right for you.

### ReFirme Skin Tightening

The ReFirme Procedure is a safe, non-surgical process that uses infrared light to tighten the skin and reverse the signs of aging. In addition, ReFirme can stimulate long-term collagen rebuilding that leaves patients with younger looking skin. This procedure treats sagging and redundant skin throughout the body, including the face, neck, abdomen, thighs, hands and

### Sun & Age Spot Removal

IPL uses gentle light pulses to erase sunspots and pigmented lesions on the face, hands, chest, arms, and legs. This treatment targets only the pigment imperfections, leaving normal skin unaffected. Additional benefits include tighter pore size and smoother texture.

### VelaShape

VelaShape contours, shapes and slims the body by improving cellulite and reducing circumference in as few as 4 treatment sessions. VelaShape is cleared by the FDA and provides dramatic results without downtime or significant discomfort.

### Laser Permanent Hair Removal

Make unwanted facial and body hair a thing of the past. At Laser Skin Esthetics we use FDA cleared laser systems for permanent hair reduction, to safely treat all skin types, including tan and dark skin.

### Laser Vein & Spider Vein Therapy

We can remove unsightly veins from all parts of the body, even sensitive areas like the face and behind the knees.

### BOTOX

BOTOX injections can successfully remove lines on the forehead, between the eyebrows, and around the eyes. BOTOX actually prevents wrinkles from appearing by relaxing the underlying muscles so they don't contract.

### Laser Skin Rejuvenation

Laser Genesis gently heats the dermis without any discomfort or downtime. It helps to reduce fine lines, sunspots, acne scarring, and improves redness. It is the perfect compliment to maintain and enhance the results gained by our other laser treatments.

### Acne Treatment

Not exclusive to teenagers, many adults in their 20's, 30's and 40's have trouble with acne. We customize various treatment options to reduce breakouts without the side effects of drugs.

### Fillers

Fillers are safe and work best for well-defined wrinkles, deep smile lines and to enhance and add fullness to the lips. Fillers can also be used to replace volume loss in the hands. The results accrue over time providing an increase in skin thickness, creating a more natural facial appearance. Filler we carry are Restylane, Perlane, Radiesse, and Juvederm.

### Facial & Chemical Peels

Anyone interested in a fresh glow will love these results which makes skin visibly softer and smoother with diminished appearance of fine lines, acne scars, uneven skin pigmentation and wrinkles. This gives improvement to skin hydration and to oily or acne prone skin.

### Microdermabrasion

Microdermabrasion refreshes skin by gently exfoliating the top layer of skin which is composed mostly of dead skin cells. This process alleviates clogged pores, acne and clears skin to produce an overall glow of the skin.
